

Folding Electric Bike

An adult electric bicycle built on a foldable steel frame and driven by a 250 W brushless motor set in the rear hub, giving quiet, balanced propulsion up to 25 km/h. The 36 V · 8 Ah lithium battery is integrated into the frame and covers 10 to 30 km on a charge, depending on riding style and terrain. It combines the ease of an e-bike with the versatility of a mountain bike: 21 speeds, front and rear disc brakes, a suspension fork and 26-inch wheels. The folding frame makes it simple to store and to carry in a car boot.

TECHNICAL SPECIFICATIONS

Motor	250 W brushless — rear hub
Battery	36 V · 8 Ah lithium (integrated)
Range per Charge	10 – 30 km
Max Speed	25 km/h
Torque	70 – 80 N·m
Charging Time	3+ hours
Gears	21-speed derailleur
Brakes	Front & rear disc brakes
Wheels	26" × 1.95
Frame	Foldable Hi-Ten steel
Weight	30 kg

KEY FEATURES

- Foldable steel frame — stores easily in a car boot
- Brushless rear-hub motor: quiet, balanced drive
- Double disc brakes, front and rear, for confident stopping
- Suspension fork and 21 speeds for every kind of road
- LCD display and an integrated, weather-sealed battery charged from a household socket
