

Worm Gearbox (NMRV)

An NMRV-series worm gearbox in a light, corrosion-resistant die-cast aluminium body. It provides very high reduction ratios in a compact footprint, with self-locking behaviour at the higher ratios. Ideal for conveyors, warehouse doors, mixers and any application needing large reduction in limited space.

TECHNICAL SPECIFICATIONS

Ratio	1:5 to 1:100
Frame Sizes	NMRV 030 – NMRV 150
Input Power	0.06 – 15 kW
Output Torque	Up to 1,700 N·m
Housing	Die-cast aluminium
Worm Wheel	Bronze
Self-Locking	Available at high ratios

KEY FEATURES

- High reduction ratios in a small package
- Light, corrosion-resistant aluminium body
- Self-locking at high ratios
- Multiple mounting orientations
- Direct motor mount or input shaft
